

Dear Sir/Madam,

Greetings of the day!

Birlamedisoft is founded in 2001, with headquarters at Pune, Maharashtra, India. Birlamedisoft has been the pioneer in developing softwares for the healthcare industry. Since its inception BirlaMediSoft has proven itself as a most trusted brand in delivering end-to-end solutions in a better and affordable way. **"Our mission is to write 'Doctor Friendly' programs for Medical Professionals, and to make Birlamedisoft a ubiquitous medical software brand that is synonymous with the best in quality and the most useful of medical software programs."**

WHAT IS NETBLOODBANK?

As the name suggests, the **'Netbloodbank'** is Blood bank management software on the internet. This is the great software to computerize blood bank operations. Information availability is not just limited to one centre. **NetBloodBank** manages all your branches using single login system. It helps blood banks to prepare all its registers like Master Register, Donor Register, Issue Register etc. There are more than 50+ registers are generated through this software. It computerizes Reporting, Billing, Inventory, Accounting functions of any Small to Large Blood banks.

We guarantee that we never compromise on our quality standards. **NetBloodBank** is one of the best Blood Bank Management Software available in the market today. This software is available over the cloud-based platform making it available anywhere, any time

This software is made available at very reasonable cost to you. The plans are available on Monthly, Quarterly, Half-yearly, Yearly and 3 Yearly basis, which are mentioned below:
