QUANTA V5.0

CLOUD HIMIS

Powered by Birlamedisoft®

*Cloud-Based
Hospital Information
Management System*

Introduction

Cloud-based HIS system, which runs using a 100% internet connection. No heavy hardware server is required at your end. We have a powerful Cloud Server from which the HIS system runs.

There is no installation on your PC/Server. You just need an internet connection to use this software. The HIS system opens from anywhere, anytime 27/7, 365 days. It has a powerful security system in place. Every user has given a unique username and password. No worry about data loss at all. Your full data is available 24/7, 365 days to you. Access all your financial details, Hospital functions on your Smartphones & Tablets. Fabulous dashboards are provided to you.

The patient can take appointments and access their EMR online using their unique username and password. Patient previous visits are recorded.
